

Employee Mobile App (PWA)

Complete employee self-service — attendance, payslips, leaves, claims & more

S.K. Sharma & Co.

smartpayrolling.com

No app-store download needed — employees just open the link and 'Add to Home Screen'. Works on any Android or iPhone.

DAILY ESSENTIALS

- **Attendance Punch** one-tap IN/OUT with GPS geofence + live selfie + exact time
- **Attendance History** monthly calendar, present/absent, punch photos
- **Leave Management** apply in seconds, live approval status, leave balance
- **Payslips** monthly salary slips with full earnings & deductions breakup
- **My Advances** advances taken, EMI deductions, outstanding balance
- **Tasks** assigned to-dos from supervisors, mark complete

EXPENSES & MONEY

- **Expense Claims (AI-powered)** photograph the receipt — AI reads vendor, amount, date & GST automatically
- **Approval Tracking** Manager -> Accounts -> Finance, live status on every claim
- **Reimbursements** paid via bank/UPI or directly inside the next salary

DOCUMENTS & IDENTITY

- **Digital ID Card** company ID card on the phone
- **KYC Upload** Aadhaar, PAN & bank details — verified by HR
- **My Documents** offer letters, contracts & company circulars

BANK-GRADE SECURITY

- **Secure Punch** registered-device passkey (phone's own Face ID / fingerprint) before the camera opens
- **Live Face Verification** 1:1 face match against the enrolled employee — nobody can punch for someone else
- **Liveness + Anti-Spoofing** random challenges block photos, screens & video replays
- **Device Binding** one registered phone per employee; replacement needs HR approval
- **Privacy First** the phone's biometric never leaves the device — only a cryptographic confirmation is used

COMMUNICATION

- **Helpdesk Tickets** raise HR queries, track resolution
- **Messages & Announcements** company circulars straight to the phone

BUILT FOR THE FIELD

- **Works Offline** punches queue offline & sync automatically — security never bypassed
- **Multi-Worksite** site selection for employees moving between locations
- **Simple Login** username/mobile + PIN, easy forgot-PIN recovery
- **Any Phone** Android & iPhone, installable like a normal app

Give your workforce a modern self-service experience — zero paperwork, full compliance.

How It Works

From setup to salary — fully automatic, zero paperwork

S.K. Sharma & Co.

smartpayrolling.com

1 One-time setup (by HR)

Add the employee in Employee Master — the system creates their login (Username / Mobile + PIN).
Optional for Secure Punch: HR enrolls the employee's face (2-5 live samples, stored encrypted).

2 Employee installs the app — no app store

Open smartpayrolling.com on the phone browser → 'Add to Home Screen' → works like a normal app.
If Secure Punch is ON: the phone registers as a trusted device using its own Face ID / fingerprint — the biometric never leaves the phone; the server only receives a cryptographic confirmation.

3 Daily punch — 10 seconds

Tap PUNCH → GPS geofence check → live selfie (photo + exact time recorded) → attendance marked.
Secure Punch adds: device passkey → random liveness challenges → anti-spoofing → 1:1 face match.
No internet? The punch queues offline and syncs automatically — security is never bypassed.

4 Self-service for everything else

Leave requests, payslip downloads, expense claims (photograph the receipt — AI fills vendor, amount, date & GST), advances, KYC upload, helpdesk tickets — each flows to the right approver.

5 Employer sees everything live

Live attendance dashboard, punch log with photos & GPS, leave/expense approval queues — and it all feeds salary processing and PF / ESIC compliance automatically. HR never re-enters data.

THE SECURE PUNCH PIPELINE

Any failed check = punch rejected. Nobody can punch for someone else — not with a photo, a video, or even the employee's own phone.

Ready in one day — we handle the full setup for your firm.
